Professional Summary

Embedded Software Engineer with 12+ years of experience in embedded systems, developing high-quality firmware and control software for industrial and mobile equipment. Skilled in text based and graphical software programming, with a proven track record of delivering full software lifecycle projects including specification, design, verification, release, and maintenance. Experienced in debugging hardware/software interfaces, writing and maintaining technical documentation, and defining structured test strategies. Passionate about continuous improvement and advancing sustainable technologies through agile development and cross-functional collaboration.

Way of Working

- Comfortable working independently or in team with transparency and clear responsibility
- Experience working in flat organizations with shared ownership
- Values structured approach leading to predictable delivery
- Values early technical correctness and robustness, enabling predictable delivery and gradual time-to-market improvements without compromising product quality
- Values automation of repeatable processes to ensure consistency, reduce manual effort, and support sustainable delivery
- Passionate to learn new technologies

Key Skills

- **Programming:** Assembly, C/C++, Python, LabVIEW, VB
- **Protocols:** TCP/IP, UART, SPI, I2C, CAN (J1939)
- **Tools & Platforms:** PLUS+1 GUIDE, Azure DevOps, Polarion, ROS, Git, SVN, REST APIs, Jira
- **Testing & Debugging:** Oscilloscope, LabVIEW, REST APIs
- **Methodologies:** Agile/Scrum, CI/CD, Functional Safety, DFMEA

Certifications & Training

- MATLAB Onramp — Dec 2021
- Simulink Onramp — Dec 2021
- LabVIEW Core 1 & 2 — Mar 2019
- Functional Safety Engineer (IEC61508:2010) — Jun 2022
- Certified Scrum Product Owner — Jul 2025

Languages

- English — Fluent
- Danish — Beginner
- Marathi — Native
- Hindi — Native

Professional Experience

Danfoss Power Solutions

Sr. Software Engineer | Danfoss Power Solutions Pvt. Ltd., Pune, India | May 2021 – Sep 2023
Danfoss Power Solutions ApS, Nordborg, Denmark (Assignment) | Oct 2023 – Sep 2025
Danfoss Power Solutions Pvt. Ltd., Pune, India | Oct 2025 – Feb 2026
Responsibilities & achievements:

- Developed and released middleware for an Autonomous Control Library and compliance libraries, including LiDAR drivers for off-highway machines (C, PLUS+1 GUIDE) on embedded Linux.
- Defined and executed unit, integration, and system test strategies to ensure reliability.
- Implemented CI/CD automation with Azure Pipelines to reduce deployment time and improve code quality.
- Contributed to standards, guidelines, and cross-cultural process improvements.

Tools: C/C++, Python, PLUS+1 GUIDE, ROS (Ubuntu), TortoiseSVN, Azure Git, Polarion

Sphinx Worldbiz Ltd. (Contract to Knorr-Bremse Technology Center India)

Sr. Software Engineer | Oct 2019 – May 2021
Responsibilities:

- Built automated test tools for rail electronics systems and designed LabVIEW OOP modules.
- Integrated REST APIs for dynamic code generation and streamlined version control workflows.

Tools: LabVIEW 2018, TortoiseSVN, JIRA

HUSCO Hydraulics Pvt. Ltd.

Sr. Engineer — Embedded Software | Apr 2019 – Oct 2019
Embedded Software Engineer | Jan 2016 – Mar 2019
Contributions:

- Worked on load sensor development from component selection through production and certification.
- Developed embedded software to control hydraulic valves and implemented automated sensor calibration.

Tools: IAR Embedded Workbench (AVR32), Serena PVCS & Tracker, Android Studio, Embedded C, CAN J1939, Vector CANalyzer

Propix Technologies Pvt. Ltd.

LabVIEW Developer | Apr 2015 – Jan 2016
Assistant LabVIEW Developer | Mar 2014 – Mar 2015
Contributions:

- Trained support engineers and developed product documentation and test plans.
- Developed industrial automation products in embedded C and LabVIEW for inspection systems.

Tools: Keil uV3/uV4, NI LabVIEW, NI Vision Development Module

Magnaflux Systems Pvt. Ltd.

R&D Engineer | Jun 2012 – Oct 2013
Contributions:

- Developed simulation/test software in NI LabVIEW and embedded assembly for UPS control systems.

Tools: Oscilloscope, Function Generator, MPLAB, NI LabVIEW

Education

- Bachelor of Engineering (Electronics & Telecommunication), Savitribai Phule Pune University — Higher Second Class

Projects
